

The New Standard in Multi-Source, Multi-Room
Sound Quality, Performance and Price!

Winner...

Innovative House Technology
Award for Multi-Room Audio/Video

More Value – A dynamic system at a breakthrough low price

More Rooms – 4-source/4-zone system expands to 32 zones

Better Sound Quality – Graduate to pure 24-bit digital, better than CD-quality sound

Increased Power Output – At 80 watts output per Keypad, Encore outperforms existing systems

In-Zone Customization – Control sound equalization, balance, loudness, dynamic range and more

Easy to Install and Use – Simple, one CAT-5 run per keypad

Audio sources are converted to 24-bit digital format at the input wall plate and then routed to the Encore DIGI-5 system Hub. Acting as a server, the Distribution Hub provides up to four input sources to each keypad. Integrated keypad amplifiers release clear, powerful sound from any selected source!
