FACT SHEET

CEL

CELLULAR PERSONAL EMERGENCY RESPONSE SYSTEM

What is the CEL?

The CEL is Tunstall's cellular personal emergency response system. The number of people eliminating their landline home telephone services is ever increasing. Tunstall's CEL enables the same features and benefits offered by traditional PERS by using a cellular network*.

How does it work?

Subscribers can call for help by pressing the button on their personal activator or CEL console. A landline or traditional phone service is not required. The call is sent to the 24-hour Response Center where trained operators can access call details (subscriber's name, address and relevant information) are displayed on screen.

The Response Center operator communicates with the subscriber through the CEL console's loudspeaker and microphone to determine an appropriate course of action.

The CEL is compatible with Tunstall's iVi Intelligent Pendant with fall detection**, which can automatically trigger a call to the Response Center if a fall is detected.

The CEL provides peace of mind to subscribers and their loved ones.

Who is it for?

A wide variety of subscribers can benefit from the CEL's state-of-the-art technology, including people who:

- Have been discharged from the hospital and require additional support and assistance at home
- Are of any age living alone
- Are older or have limited mobility
- Are subject to domestic violence or harassment
- Have household security issues or are living in fear of crime
- Are caring for someone in their home
- Have long-term conditions such as dementia, heart disease, COPD, etc.
- Have mental, physical or sensory impairments

The CEL offers family, caregivers and friends the reassurance that their loved ones can use their personal activator to easily call for help whenever they need it from anywhere in and around the home.

Tunstall

CEL

CELLULAR PERSONAL EMERGENCY RESPONSE SYSTEM

Key Features	Benefits
• Operates on cellular network	• No need for land-line
• SIM and cell service managed by Tunstall	• Subscriber doesn't need to be concerned with cellular contracts
• Programmable "non-emergency" 2nd button on console	• For easy access to a triage or concierge service
• Works right out of the box	• Simple and easy set-up
• Audio messages available in 3 languages	• Device audibly announces call progress and status messages to subscriber
• 30 hour back-up battery	• Provides reassurance in the event of a power outage
• Two-way voice communication	• Allows base unit to be used as a speaker phone
• 24/7 professional monitoring service	• Always there when you need us
• Integrated programming keypad and remote programming	• Allows settings to be changed either on site or remotely
• Supports multiple personal activators	• Allows multiple subscribers to use a single console unit
• Compatible with iVi Intelligent Pendant with fall detection	• Automatically generates a call for assistance if a fall is detected
• FDA and ETL listed	• Quality is key
Personal Activator	
• Multiple wearing options	• Personal pendant may be worn as a necklace or bracelet (belt clip may be ordered separately)
• 390ft (120m) radio range in free space	• Range suitable for typical dwellings/homes
• Water resistant (IP67)	• Can be worn in shower or bath

*The CEL requires a satisfactory GSM cellular network connection to operate as intended. Coverage may not be available in all areas and may change after system activation due to environmental conditions. *Fall detection feature does not detect 100% of falls. If able users should always press their help button when they need help.
